

# Building a More Sustainable Airline: By the Numbers

We're working with customers and industry partners on innovative and impactful sustainability efforts – to help protect the planet

## IMPLEMENT A PATH TO DECARBONIZE THE AIRLINE INDUSTRY

Year we plan to achieve net zero carbon emissions

3

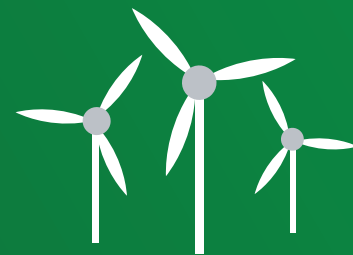

Number of high-quality, verified carbon reduction projects supported when our customers purchase offsets through our partner Cool Effect

## SOURCE RENEWABLE ENERGY

100%

of our Fort Worth-based Skyview Headquarters facilities and operations powered by renewable energy

2.5M

Gigajoules of renewable energy we aim to source by 2025 equivalent to 20M gallons of jet fuel

77.5K

Reduction in cumulative metric tons of carbon emissions due to sustainable aviation fuel purchases

9M

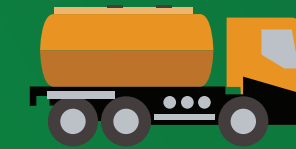

Gallons of sustainable aviation fuel we have committed to purchase from NESTE in the next 3 years

## IMPROVE FUEL EFFICIENCY

\$24B

Amount invested in new, more efficient aircraft since 2013

1M

Gallons of fuel saved annually once our fleet is repainted with our new non-mica Silver Eagle paint

8.9M

Reduction in cumulative tons of carbon emissions due to improved fuel efficiency through 2019

## CONTINUE DEVELOPING SUSTAINABLE PRODUCTS, FACILITIES AND TECHNOLOGIES

2019

Year we became the first major U.S. carrier to begin IEnvA environmental certification

Our 2020 score from the Carbon Disclosure Project, which scores companies on their climate goals and emissions management

340K

Pounds of aluminum cans recycled annually through flight services

8

Number of LEED certified facilities
